

## The Stoneham Prize

### PRIZE RULES

#### Establishment

This prize has been established by a contribution to the University by Mr Peter Fisher for the purpose of establishing an annual prize with the School of Mathematical Sciences.

#### Value and Payment

The value of the Prize will be \$250.00 per year, until otherwise determined by the University after discussions with the contributor.

The prize is paid as a result of a donation made by Mr. Peter Fisher to the value of \$1000.00 (GST free). The capital for the prize is held in perpetuity resulting in the minimum annual prize distribution paid from a composite fund.

#### Eligibility

The prize will be awarded annually by the University to a Doctor of Philosophy student in the School of Mathematical Sciences who has created promotional material as part of their candidature.

#### Selection of Candidate

The Head of the School of Mathematical Sciences will award the prize to the eligible student who produces what is deemed to be the best promotional material specified above.

No one shall receive the prize more than once.

If there is no candidate of sufficient merit in a given year then the prize will not be awarded in that year.

If there is more than one candidate of equal merit, then the prize shall be shared equally.

#### Variations

The University may vary the rules from time to time in a manner consistent with the original objectives of the prize.
