

The Rutter Jewell-Thomas Medal and Prize

PRIZE RULES

Establishment

This endowed prize has been established by a donation to the University by Mr Rutter Jewell-Thomas in 1954 for the purpose of founding a medal and prize in Metallurgical and Chemical Engineering.

The capital for the prize is held in perpetuity resulting in the minimum annual prize distribution paid from the Endowment Fund.

Value

The value of the Prize will be \$600.00 per year, plus an engraved medal, or such other amount as the University shall from time to time determine provided that the value of the prize does not exceed the annual distribution of interest available from the Endowment Fund¹.

Eligibility

The prize will be awarded annually by the University to eligible students enrolled in the Bachelor of Engineering (Honours) (Chemical) degree program or associated double and combined degrees.

Selection of Candidate

The Head of the School of Chemical Engineering or nominee will award the prize to the student placed first on academic merit in the final year of the degree and who has completed one or both of the following electives in their final year:

CHEM ENG 4059 Pyrometallurgy or
CHEM ENG 4058 Hydrometallurgy & Electrometallurgy

If there is no candidate of sufficient merit in a given year then the prize will not be awarded in that year and the money will be used in subsequent years. In this case, provision may be made for multiple prizes in subsequent years.

If there is more than one candidate of equal merit, then the prize shall be shared equally.

Variations

The University may vary the rules from time to time in a manner consistent with the University's legal obligations and [policies](#).

Rules approved by Deputy Vice Chancellor & Vice President (Academic) 8 September 2016
