# Bachelor of Computer Science

## Program Notes

### Level I Mathematical Sciences Course

- Students must complete either *MATHS 1004 Mathematics for Data Science* or *MATHS 1012 Mathematics IB*, but may not present both towards their degree.
- To enrol in *MATHS 1012 Mathematics IB* students must first pass *MATHS 1011 Mathematics IA*, this is presented as a level I elective. Entry into *MATHS 1011 Mathematics IA* requires *SACE Stage 2 Specialist Mathematics*, or a pass in *MATHS 1013 Mathematics IM*.
- Students starting in semester 2 that choose to study *MATHS 1012 Mathematics IB*, will need to take either *MATHS 1011* or *MATHS 1013* in their first semester of study, and take *MATHS 1012* in a later semester.
- Students interested in the Artificial Intelligence or Data Science majors are strongly encouraged to take *MATHS 1012 Mathematics IB*.

### Programming Experience

- Students with prior programming experience do not need to complete *ENG 1002 Programming (Matlab and C)*, and can replace it with a level I Elective.
- If *ENG 1002 Programming (Matlab and C)* is replaced, the following courses must be completed in order, first *COMP SCI 1102*, then *COMP SCI 2103* and then *COMP SCI 2201*. However, these courses and *COMP SCI 2000* may be completed one semester earlier than in the study plans.

### General Electives

- General Electives must include **Broadening Electives** to the value of **9 units** that are not from the following subject areas: COMP SCI, MATHS, PURE MTH, APP MATH, STATS. *ENG 1002* does not count towards the Broadening electives requirement.
- Electives may be any University of Adelaide Undergraduate course for which the student meets the pre-requisites. Please check the availability, restriction and incompatible section on the course planner for elective choices.
- How to choose an elective course in your area of interest? Please refer to the steps via the link: <https://ecms.adelaide.edu.au/study-with-us/student-support/enrolment>
