

The David Pawsey Prize in Electrical & Electronic Engineering PRIZE RULES

Establishment

In 1985 donations were made to the University upon the retirement of Mr David Pawsey in recognition of his 34 years' service in the Department of Electrical Engineering. In 2009 it was decided to establish an annual prize from those funds to recognise and encourage outstanding students in Electrical Engineering.

The capital for the prize is held in perpetuity resulting in the minimum annual prize distribution paid from the Endowment Fund¹.

Value

The value of the Prize is \$850.00 per year, or such other amount as the University shall from time to time determine provided that the value of the prize does not exceed the annual distribution of interest available from the Endowment Fund.

Eligibility

To be eligible for the Prize students must be enrolled in the Bachelor of Engineering (Honours) (Electrical & Electronic) or associated double and combined degrees at the University of Adelaide.

Selection of Candidate

The Head of the School of Electrical & Electronic Engineering or nominee will award the Prize to the student who placed highest in order of academic merit as a result of their first attempt in the assessment of the Level II course: ELEC ENG 2104 Digital Signal Processing.

If there is no candidate of sufficient merit in a given year then the Prize will not be awarded in that year and the money will be used in subsequent years. In this case provision may be made for multiple Prizes in subsequent years.

If there is more than one candidate of equal merit, then the Prize shall be shared equally.

Variations

The University may vary the Rules from time to time in a manner consistent with the University's legal obligations and [policies](#).

Approved:

.....
Deputy Vice Chancellor & Vice President (Academic)
Professor Pascale Quester

Date: 20/03/20
